

INFORMATION DISCLOSURE STATEMENT

U.S. Patent No. 5,628,273 (1997) discloses a boat misting system attachable to a frame supporting a canopy. The pressure of each misting nozzle is adjustable, but the direction of the misting spray is not adjustable.

U.S. Patent No. 6,175,969 B1 (2001) discloses a boat misting system wherein the pressure of each misting nozzle is not adjustable and the source of pressurized water is a holding tank.

U.S. Patent No. 5,330,104 (1994) discloses a portable misting system to be carried in a food and beverage cooler, including a hose for immersion in a water source and a solar panel.
